

Vetonit Solvent XX300

Resin cleaning & thinning solvent

Uses

- Clean equipment and tools after use or mixing of epoxy and urethane-based resins.
- Thinning specific epoxy and urethane products.

Product Description

Vetonit Solvent XX300 is a specially developed solvent blend for use with the resins commonly found in Saveto products and other construction chemicals. Vetonit Solvent XX300 is much more effective than common solvents such as Xylene, white spirit, heavy-naphtha.

Application

It is best to pour some Vetonit Solvent XX300 into a container and clean the implements within this container for cleaning tools.

For cleaning substrates, the solvent can be poured directly or applied by cloth or paper.

For the thinning application of Saveto products, please refer to the product datasheet, and consider the thinning ratio to the original material, or refer to the local Saveto office for further information.

For other products, strictly follow the product thinning ratios mentioned in the technical datasheet.

Packaging

Product	Pack Size
Vetonit Solvent XX300	5 & 20 Liters Container

Actual consumption depends on the nature of the substrate, method of application, and wastage.

Shelf Life & Storage

The original sealed container of Vetonit Solvent XX300 has a shelf life of 12 months, provided it is stored clear of ground in a dry well ventilated, and shaded place below 35°C.

Technical Data

Vetonit Solvent XX400	Typical Values @ 20°C
Appearance	Pale Liquid
Density	0.87
Moisture	<0.10%

Health & Safety

Vetonit Solvent XX300 is an industrial-grade solvent that should not contact skin and eyes or be swallowed. Avoid inhalation of vapor and spray. Use only in well-ventilated areas. In case of insufficient ventilation, wear suitable respiratory protection. Wear suitable protective clothing, gloves, and eye/face protection. In case of contact with eyes, rinse immediately with plenty of water, and seek medical advice. If swallowed, seek medical attention immediately - do not induce vomiting.

No smoking or naked flames.

Refer to the product Material Safety Data Sheet for further information.

Additional Information

Saveto manufactures a wide range of construction chemicals and specialty products for various applications divided into the following product groups:

- Waterproofing Systems.
- Concrete Repairs & Grouts.
- Flooring Systems.
- Wall & Facade Systems.
- Sealants and Joints.
- Renders & Finishes.
- Plasters & Masonry.
- Tile adhesives & Grouts.
- Primers & Ancillary Products.
- Thermal Insulation Systems.
- Protective Coatings.
- Accessories.

Saveto also provides various technical information such as CAD details, detailed method statements, specification clauses, application manuals, product selectors and technical support both in contractors and consultants offices as well as construction sites.

For further information on these products and systems kindly check our website or contact your local Saveto representative.

For professional use only. Keep out of reach of children.

Due to continuous product improvements, the data mentioned in this document is subject to change without prior intimation. All recommendations and suggestions are therefore made without guarantee. Samples will be provided on request to enable customers to satisfy themselves as to the suitability of the product for any specific purpose and to assess the product under their own working conditions. The application, use and processing of our products and the products manufactured by you on the basis of our technical advice are beyond our control and, therefore, entirely your own responsibility.
